

Optimize your simple machines...

Modicon M218 Selection Guide

> Compact Solution for Simple Machines

Optimized Logic Controller Modicon M218

With intelligent software platform, specialized functional blocks, powerful embedded functions and flexible system configuration, Modicon M218 can definitely meet your control requirements in target industries including plastic machinery, textile machinery, packaging machinery and universal machinery.

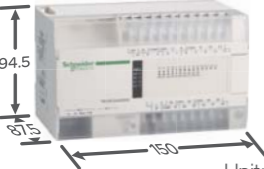

With “all-in-one” solution in a compact unit and its expandability, the Modicon M218 Logic Controller is developed specifically for machine builders (OEMs) to optimize their simple machines:

- 100-240V AC power supply
- Mini USB-B programming port for easy programming and debugging
- Two embedded RS-485 serial links for connection to Modbus device
- One run/stop switch is integrated on each controller to toggle its status
- Simple, obvious and safe wiring with removable terminal blocks and color screw
- Full integrated functionality
- Easy connectivity

> Modicon M218 24 I/O Bases

Three 24 I/O PLC models are available. Embedded with 14 discrete inputs and 10 discrete relay outputs, they provide high-speed counting and Ethernet functions.

Basic model	HSC model	Ethernet model
 Unit: mm TM218LDA24DRN	 Unit: mm TM218LDA24DHN	 Unit: mm TM218LDAE24DRHN
100-240 VAC power supply	100-240 VAC power supply	100-240 VAC power supply
14 discrete inputs	14 discrete inputs Including 4 fast inputs Can be used for 2/4 channel high speed counting	14 discrete inputs Including 4 fast inputs Can be used for 2/4 channel high speed counting
10 relay outputs	10 relay outputs	10 relay outputs
mimi USB-B programming port	mimi USB-B programming port	mimi USB-B programming port
serial link x 2	serial link x 2	serial link x 2
		Ethernet port

Adapt your configuration to perfectly suit your needs with powerful, efficient and economical expansion modules.

Extension module TM2DMM16DRTN can be connected directly to M218.
Compatible with TM2 discrete IO, analog IO and HSC module.

M218 24 IO Bases
TM218LDA.24DR.N

4 extension modules max., control up to 152 I/Os, including up to 42 I/Os for relay outputs

M218 Discrete I/O expansion module TM2DMM16DRTN

TM2 DOCKN expansion dock TM2 DOCKN

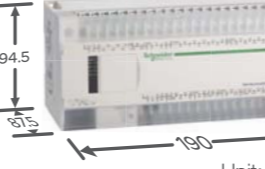

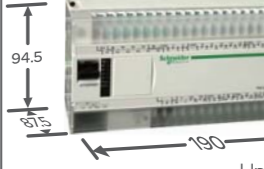

TM2 Discrete I/O expansion module TM2 D.I TM2 D.O

TM2 Analog I/O expansion module TM2 AMI/ARI/A.O TM2 A.M

TM2 HSC expansion module TM200HSC206D

> Modicon M218 40 I/O Bases

Four 40 I/O PLC models are available. Embedded with 24 discrete inputs and 16 relay/transistor outputs, they provide high-speed counting, pulse train output, analog I/O, and Ethernet functions.

Analog model		PTO model	Ethernet model
 Unit: mm TM218LDA40DR2HN	 Unit: mm TM218LDA40DR4PHN	 Unit: mm TM218LDA40DRPHN	 Unit: mm TM218LDAE40DRPHN
100-240 VAC power supply	100-240 VAC power supply	100-240 VAC power supply	100-240A AC power supply
14 discrete inputs Including 4 fast inputs Can be used for 2/4 channel high-speed counting	14 discrete inputs Including 4 fast inputs Can be used for 2/4 channel high-speed counting	14 discrete inputs Including 4 fast inputs Can be used for 2/4 channel high-speed counting	14 discrete inputs Including 4 fast inputs Can be used for 2/4 channel high-speed counting
10 relay outputs	10 relay outputs	10 relay outputs	10 relay outputs
	4 transistor outputs Can be used as 2 channel PTO/PWM	4 transistor outputs Can be used as 2 channel PTO/PWM	4 transistor outputs Can be used as 2 channel PTO/PWM

			Ethernet port

Adapt your configuration to perfectly suit your needs with powerful, efficient and economical expansion modules.

Extension module TM2DMM16DRTN can be connected directly to M218.
Compatible with TM2 discrete IO, analog IO and HSC module.

M218 40 IO Bases
TM218LDA.40DR..HN

7 extension modules max., control up to 248 I/Os, including up to 90 I/Os for relay outputs

M218 Discrete I/O expansion module TM2DMM16DRTN

TM2 DOCKN expansion dock TM2 DOCKN

TM2 Discrete I/O expansion module TM2 D.I TM2 D.O

TM2 Analog I/O expansion module TM2 AMI/ARI/A.O TM2 A.M

TM2 HSC expansion module TM200HSC206D

> Compact

Powerful control functions and communication capabilities optimize your applications

Two RS-485 serial links including one RJ45 port (SL1) and a terminal block (SL2)

DIN guide rail mounting clamp

High speed counting

2 A/B phase (max. 100KHz, 45...55% duty) or 4 single phase HSC channels (max. 100KHz)

Pulse train output

2 PTO/PWM outputs, for motion function multiplex with 4 transistor outputs (PTO : 100KHz, PWM : 1KHz)

Analog I/O

The analog IOs are embedded with either 2 AO/2 AI or 2 AOs, which enables analog monitoring without extension

Serial link

2 RS-485 serial ports are embedded in standard configuration to communicate with field devices such as HMI and frequency converter

Ethernet

The Ethernet port are embedded with RJ45 port to facilitate high-speed data exchange

> Expandable

M218 expansions and TM2 expansions can be mixed on a M218 logic controller.

TM218LDA.24DR.N can be expanded with up to 4 expansion modules

TM218LDA.40DR..N can be expanded with up to 7 expansion modules

TM2DMM16DRTN

> M218 soft connection extension module TM2DMM16DRTN

(discrete inputs/8 relay outputs)

TM2DOCK

> TM2 extension module interface

TM2DDI8DT

TM2DDI32DK

> TM2 discrete input module

- Removable screw terminal block
 - TM2DDI8DT (8 DC inputs)
 - TM2DAI8DT (8 AC inputs)
 - TM2DDI16DT (16 DC inputs)
- HE10 connector
 - TM2DDI16DK (16 DC inputs)
 - TM2DDI32DK (32 DC inputs)

TM2DDO8UT/DRA8RT

TM2DDO16UK

> TM2 discrete output module

- Removable screw terminal block
 - TM2DDO8UT (8 transistor sink outputs)
 - TM2DDO8TT (8 transistor source outputs)
 - TM2DRA8RT (8 relay outputs)
 - TM2DRA16RT (16 relay outputs)
- HE10 connector
 - TM2DDO16UK (16 transistor sink outputs)
 - TM2DDO16TK (16 transistor source outputs)
 - TM2DDO32UK (32 transistor sink outputs)
 - TM2DDO32TK (32 transistor source outputs)

TM2DDO32UK

TM2DRA16RT

> TM2 discrete mixed module

- Removable screw terminal block
 - TM2DMM8DRT (8 DC inputs/4 relay outputs)
- Fixed spring terminal block
 - TM2DMM24DRF (16 DC inputs/8 relay outputs)

TM2DMM8DRT

TM2DMM24DRF

TM200HSC206DT

> TM2 counter module

- Removable screw terminal block
 - TM200HSC206DT (2-channel 60kHz)
- Fixed spring terminal block
 - TM200HSC206DT (2-channel 60kHz)

TM200HSC206DT

TM2AMI2HT

TM2AMI2LT

> TM2 analog input module

- Removable screw terminal block
 - TM2AMI2HT (2 analog inputs)
 - TM2AMI2LT (2 thermocouple inputs)
 - TM2AMI4LT (4 analog & temperature inputs)
 - TM2AMI8HT (8 analog inputs)
 - TM2ARI8HT (8 temperature inputs)
 - TM2ARI8LT (8 Pt 100/100 inputs)
- RJ11 connector
 - TM2ARI8LRJ (8 Pt 100/100 inputs)

TM2ARI8LRJ

TM2ARI8LT

TM2AMO1HT

TM2AVO2HT

> TM2 analog output module

- Removable screw terminal block
 - TM2AMO1HT (1 analog output)
 - TM2AVO2HT (2 analog outputs)

TM2DMM8DRT

TM2DMM24DRF

> TM2 analog mixed module

- Removable screw terminal block
 - TM2AMM3HT (2 analog inputs/1 analog output)
 - TM2ALM3LT (2 temperature inputs/1 analog output)
 - TM2AMM6HT (4 analog inputs/2 analog outputs)

> Flexible

Modicon M218 logic controller provides machine builders with flexible and cost-effective solutions to optimize their simple machines.

Integrated Schneider Electric solutions using Modicon M218 as the control core

With intelligent software platform, specialized functional blocks, powerful embedded functions and flexible system configuration, Modicon M218 can definitely meet your control requirements in target industries including plastic machinery, textile machinery, packaging machinery and Universal machinery.

Universal equipment

Textile machinery

Plastic machinery

Packaging machinery

Material handling

Assembly

> Intelligent

Program your M218 Modicon controllers easily with the SoMachine software integrating 6 programming languages, ready-to-use automation system function libraries, powerful memory management, powerful debugging functions and preset debugging screens.

SoMachine software platform

Development and maintenance of a complete project can be completed on a single SoMachine software platform.

- One software platform
- One project document
- One cable connection
- One download operation

1 software environment SoMachine

- One software
- One project file
- One connection
- One download

Multiple hardware control platforms

- Embedded intelligence in drives, HMI displays, motion & logic control devices
- The basis of an already tested, validated & documented offer of architectures & function blocks

SoMachine helps machine builders, design more energy efficient and cost effective machines and installations based on tested, validated and innovative architectures whilst maximising their performance.

Modicon M218 24-I/O base

Power supply	100-240V AC (50-60Hz)		
User memory	1024KB		
Extension & I/O capacity	4 extension modules max., control up to 152 I/Os, including up to 42 I/Os for relay outputs		
Discrete I/O	Input	14	
	Output	10 relays	
Embedded function	High speed counter	2 reduced HSC channels, max. 10KHz	
	Pulse train output	2 main channels(single, A/B phase(X1.X2.X4), P/D, CW/CCW) or 4 single channels, max. 100KHz	
Embedded communication port	USB-B mini port	Programming port for SoMachine	
	RJ45 port (Modbus)	Non-isolated RS485 -Protocol : Master/Slave Modbus ASCII/RTU or ASCII, SoMachine	
	Terminal Block (Modbus)	Non-isolated RS485 -Protocol : Master/Slave Modbus ASCII/RTU or ASCII	
	RJ45 port (Ethernet)	-
